- 1. A system for automatically establishing at least one TV setting based on at least one of: a geographic location of a TV, a location of a TV with respect to a dwelling, and a time, comprising:
 - a TV; and
 - a processor coupled to the TV and receiving information representative of at least one of: a geographic location of a TV, a location of a TV with respect to a dwelling, and a time, the processor establishing at least one setting based at least partially thereon.
- 2. The system of Claim 1, wherein the information is input by a viewer of the TV.
- 3. The system of Claim 1, wherein the information is received via a global positioning satellite.
 - 4. The system of Claim 1, wherein the setting is a video setting.
 - 5. The system of Claim 1, wherein the setting is an audio setting.
 - 6. The system of Claim 1, wherein the setting is a menu color.
 - 7. The system of Claim 4, wherein the setting is contrast.
 - 9. The system of Claim 4, wherein the setting is color.
 - 10. The system of Claim 4, wherein the setting is tint.
 - 11. The system of Claim 5, wherein the setting is volume.
- 12. The system of Claim 1, wherein the processor accesses a set of heuristics to undertake the establishing act.

5

- 13. The system of Claim 1, further comprising an input device manipulable to establish the settings.
- 14. The system of Claim 13, wherein manually input settings are used by the processor to alter the heuristics.
- 15. A method for establishing at least one TV setting on a TV based on at least one of: location of the TV, and time, comprising:

providing a set of correlation heuristics;

receiving an input comprising at least one of: the location, and the time; and

accessing the set of correlation heuristics to correlate the input to the setting.

- 16. The method of Claim 15, wherein the location is a location of the TV within a building.
- 17. The method of Claim 15, wherein the location is a geographic location of the TV.
 - 18. The method of Claim 15, wherein the time is a time of day.
 - 19. The method of Claim 15, wherein the time is a date.
- 20. The method of Claim 15, wherein the input is received from a viewer of the TV.
- 21. The method of Claim 15, wherein the input is received from a global positioning satellite.
 - 22. The method of Claim 15, wherein the setting is a video setting.
 - 23. The method of Claim 15, wherein the setting is an audio setting.

20

20

- 24. The method of Claim 15, wherein the setting is a menu icon scheme.
- 25. A system for tailoring TV settings to a TV location and/or a time, comprising:

means for inputting the location and/or time to establish an input;
means for correlating the input to at least one setting associated with
the TV; and

means for establishing the setting on the TV.

- 26. The system of Claim 25, wherein the means for inputting is a human-manipulable TV control device associated with the TV.
- 27. The system of Claim 25, wherein the means for inputting is a wide area source of data.
- 28. The system of Claim 25, wherein the means for correlating is a processor located in the TV.
- 29. The system of Claim 25, wherein the means for correlating is a processor located in a set-top box associated with the TV.
- 30. The system of Claim 25, wherein the setting is at least one video setting.
- 31. The system of Claim 25, wherein the setting is at least one audio setting.
- 32. The system of Claim 4, wherein the processor determines whether to display closed captioning based on the information.
- 33. The system of Claim 5, wherein the setting is an audio dynamic range.

35. The system of Claim 5, wherein the setting is at least one of: audio treble, bass, EQ, or surround sound.
